The award winning teledermatology service for the NHS.

Featuring the innovative TELEDerm App for iPhone.

Safe, trusted, compliant and highly rated.

Patient Safety Awards Winner.

Now available to NHS CCGs and Hospital Trusts for provision to NHS GPs.

Exclusively from The MOLE Clinic Ltd, Approved NHS Business Partner.
Preferred Model of Care

TELEDerm® provides a high quality, clinically effective and evidence based model of care and is recommended for use by an NHS GP or nurse, as Referring Clinician, who is uncertain as to the diagnosis of a skin lesion and needs rapid advice from a skin specialist who is expert in dermoscopy.

Perfect in GP Practice

TELEDerm is an easy 4 minute process

1. The patient is provided with a TELEDerm® Leaflet and signs a TELEDerm® Consent Form.
2. The Referring Clinician uses the TELEDerm® iPhone® App to record a proforma clinical history.
3. The Referring Clinician uses the App and an iPhone® compatible dermatoscope to record images, including a dermoscopic image, of the lesion.
4. Patient data is then encrypted, transferred securely via WIFI or 3G/4G to the TELEDerm® website and automatically deleted from the iPhone®.

Compliant by Design

TELEDerm® is designed to comply with CQC Care Quality Standards, NHS Connecting for Health Information Governance Standards and PCC Teledermatology Quality Standards.

Compliance Features

- Developed around patient needs
- Compliant with National Guidance
- Integrated Patient Informed Consent
- Supports staff with training & feedback
- Highest quality patient history & images
- Robust communications between clinicians
- Security and Privacy Standards compliant
- Integrated Patient Survey & fully auditable

The Patient’s Choice

“TELEDerm® is rated 100% Good to Excellent by patients.”
Dr Foster Patient Survey.

The GP’s Choice

“TELEDerm® provides reassurance quickly – that’s brilliant for patients who are not waiting for an unnecessary hospital appointment. It’s also a huge financial saving for the NHS, which is important in these times of financial constraints.”
Dr M. Read, GP, NHS Sheffield.

The Commissioner’s Choice

“Commissioning TELEDerm® for our 500 GPs was the most effective part of our dermatology service re-design, achieving savings of £400,000 over 2 years. I recommend the service to every Commissioner and GP in the NHS.”
Sue Luff, Commissioner for Dermatology, NHS Kent & Medway.

Rapid Expert Advice

TELEDerm® Reporting Clinicians are NHS skin specialists who are expert in dermoscopy.

Reporting Clinicians assess patient data on the TELEDerm® website and record the presence or absence of dermoscopic features, providing a suggested diagnosis and management plan.

Referring clinicians receive an email alert within 3 business days inviting them to log onto the TELEDerm® website to view the TELEDerm® Report, which can be downloaded as a .pdf and attached to the patient’s file.

99% of TELEDerm® Reports are available the next day.

Proven Benefits

GPs using TELEDerm® report a 75% reduction in avoidable referrals of skin lesions, improved initial diagnosis of skin cancers and increased diagnostic skills and confidence levels.

Market Leader

TELEDerm® is the UK market leading teledermatology service, currently commissioned by 13 CCGs for use by almost 4,000 GPs.
